

Safe Sleep Implementation Information "Journey" - Progress Record

Item Required by Policy	Proposed Solution	Percentage Achieved 2013			
		March	April	May	June
1. Provide written advice on safe sleeping that is tailored to the families/whanau needs					
2. Document what needs to occur to mitigate identified risks as an action plan in the clinical notes and share and/or hand over these actions to others involved in the provision of health care					
3. Document the actions taken to support safe sleep in the clinical notes.					
4. Seamless information flow and record keeping with regard to safe sleep is a high priority to ensure health professionals have the correct information on which to base advice and families receive clear consistent advice					
5. Needs assessment with regard to risks and prevention of SUDI is a routine part of health care in NMDHB and an action plan to mitigate risks and support families will be clearly documented in case notes.					
6. information about safe sleep is an important part of all transfers of care					
7. All pregnant women will be provided with verbal and written information about safe sleeping practices including co-sleeping hazards as a part of an individualised care plan with the LMC. The care plan within the clinical record will identify a needs assessment and action plan to support safe sleeping.					
8. Every infant discharged from NMDHB will be supported in linking to primary care services including Lead Maternity Carer, General Practice and Well Child Care/Tamariki Ora services with the completion of the Newborn Enrolment Form, and electronic discharge summaries.					
9. Handover of care and referrals between health professionals (especially LMC, General Practice, Well Child/Tamariki Ora and Whanau Ora) must include information on safe sleeping practises and risk factors present for the infant
